PROFESSIONAL SUMMARY

Data Analyst with 5 years of experience analyzing **financial data, building dashboards, validating datasets, and supporting decision-making** for public- and private-sector organizations. I am skilled in **SQL, Python, Excel, Power BI, and statistical modeling** with experience in **budget analysis, forecasting, cost-benefit analysis, and data-driven program evaluation**. Adept at preparing narrative and financial reports, **supporting grants/compliance documentation, and translating complex data into actionable insights** for leadership.

SKILLS

Financial & Data Analysis: Budget Development & Monitoring, Financial Reporting, Variance Analysis, Cost-Benefit Analysis, Forecasting, Trend Analysis, Program & Policy Evaluation, Grants Monitoring & Compliance

Programming & Analytics: Python, SQL, R, Advanced Excel (Pivot Tables, VLOOKUP, Power Query), Data Cleaning, ETL Preparation, Statistical Analysis

BI & Visualization: Power BI, Tableau, KPI Dashboards, Narrative Reporting

Data Management: Data Modeling, Data Validation, Data Integration from Multiple Sources, Large Dataset Handling

Reporting & Documentation: Narrative & Financial Report Writing, Public-Sector Documentation, Analytical Presentations

Collaboration & Tools: Git, GitHub, Jira, Confluence, Agile/Scrum, Stakeholder Communication

Additional Technical Skills: Azure Databricks, ADF, Snowflake, Shell Scripting, Basic AWS.

EXPERIENCES

Conflux System | Dallas, Tx

January 2025 - Present

Data Analyst

- Performed **financial and operational data analysis** to support forecasting and variance tracking.
- Prepared **narrative and quantitative reports** for leadership to support budgeting decisions.
- Automated **Azure Databricks pipelines using Git and CI/CD**, improving **deployment speed by 25%**.
- Built **end-to-end data monitoring solutions** using **Azure Monitor and automated alerts**.
- Deployed analytics workloads using **Docker containers and Git-based workflows**.
- Modernized legacy processes by introducing **DevOps principles** like version control and automation.

Florida International University | Miami, FL

August 2024- December 2024

Research Analyst

- Migrated **legacy data to Azure SQL Server and Synapse Analytics**, improving reporting efficiency by 25%.
- Ensured **data accuracy through SQL-based validation and reconciliation** across multiple systems.
- Built **executive-level Power BI dashboards** tracking retention, acquisition, revenue, and financial KPIs.
- Analyzed **large financial and transactional datasets** to support forecasting and strategic decision-making.
- Partnered with stakeholders to **translate business requirements into actionable insights**.

Shriram Chits Private Limited | Vijayawada, AP

January 2019 - December 2020

System Analyst

- Migrated legacy datasets to **Azure SQL Server & Synapse**, improving data availability by 25%.
- Performed **SQL-based data validation** and developed retention and acquisition dashboards in Power BI
- Performed **data mapping and reconciliation** to ensure data accuracy across departments.
- Analyzed large financial datasets and validated transactions.
- Developed dashboards for **customer financial trends and revenue forecasting**.
- Ensured accuracy of financial reporting across departments.

Gamma Private Limited | Hyderabad, AP

October 2017 - December 2018

Customer Analyst

- Conducted analysis on **revenue, retention, and financial trends** to support budget planning.
- Analyzed **CRM datasets to identify churn, purchase patterns, and high-value customer segments**.
- Built dashboards and trend analyses in **Tableau and Excel** to improve customer retention programs.
- Supported marketing optimization through **cohort analysis and reporting automation**.
- Developed **automated SQL scripts** for reporting and auditing in support of enterprise data governance initiatives.

PROJECTS

Sales Operations Data Analyst Project – The Sales League | FIU

January 2025 - May 2025

- Cleaned and transformed raw, inconsistent sales data into an **accurate, actionable dataset using Google Sheets**.
- Developed a comprehensive **performance dashboard** tracking Cash Collected, YTD Closing %, YTD Show Rate, Consult Funnel, and Dial Volume.
- Generated key insights and recommendations to improve team efficiency, including coaching strategies for low show rates and sharing best practices from top performers.
- Proposed and implemented automation strategies using **IMPORTRANGE, QUERY, SUMIF, and Google Sheets formulas** to ensure live, self-updating dashboards.
- Demonstrated business impact analysis, data storytelling, and the ability to translate metrics into actionable strategies for leadership.

Airbnb Data Analysis Using Machine Learning | FIU

January 2024 - May 2024

- Built **predictive models in Python** to forecast rental pricing across neighbourhoods based on seasonality, location, and demand, achieving a 25% improvement in accuracy.
- Conducted **customer segmentation and feature engineering** using Pandas/NumPy to capture booking behaviour's and improve model interpretability.
- Applied predictive modeling for pricing strategy similar methods used in revenue forecasting.
- Designed **interactive dashboards in Power BI** to visualize pricing patterns across neighbourhood's and timeframes, supporting data-informed pricing strategies.

Crime Data Analysis and Visualization Using Machine Learning | FIU

August 2024 - December 2024

- Processed and analyzed large city-level crime datasets using **Azure Databricks** for cleaning, trend discovery, and anomaly detection.
- Performed trend analysis and forecasting useful for resource allocation and public program planning.
- Designed **real-time Power BI dashboards** to visualize crime hotspots, incident trends, and temporal patterns, supporting law enforcement in resource allocation.
- Applied **forecasting models** to detect emerging hotspots, enhancing situational awareness and proactive planning.
- Automated recurring insights with scheduled reports, reducing manual reporting time and improving decision-making efficiency.

CONFERENCE

Attended the **KFSCIS Tech Summit**, a flagship event hosted by the Knight Foundation School of Computing and Information Sciences at my university during my master's program. The summit, held on November 30th and December 1st, focused on the profound influence of Artificial Intelligence (AI) in areas such as Education, Healthcare, Finance, Climate, and more. This experience provided a valuable platform to delve into the latest trends in AI, connect with industry leaders, and involve in impactful discussions with fellow students and faculty

VOLUNTEER EXPERIENCE

- Conducted and led an **"Introduction to Data Science"** workshop for students at FIU as part of the Computing Alliance of Hispanic Serving Institutions (CAHSI) initiative. The workshop aimed to introduce Data Science concepts in an accessible manner, catering to students with diverse programming backgrounds.
- I actively volunteered in both technical and non-technical festivals throughout my undergraduate years, playing a key role in **event planning, organization, and creating memorable experiences for participants**.

EDUCATION

Masters in Data Science & Artificial Intelligence | FIU; Miami, FL (GPA: 3.92/4.00)

August 2023 - April 2025

Bachelors in ECE | JNTU; Kakinada, AP (GPA: 3.55/4.00)

August 2013 - June 2017
